

Michael Badger DMD and Robert Spiller DMD MS

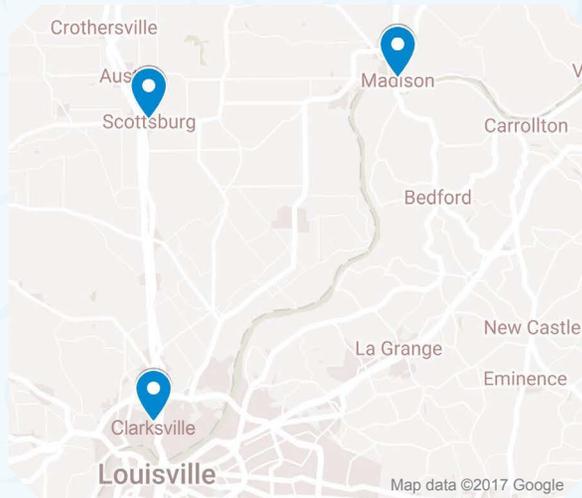

Dr. Badger and Dr. Spiller have established a wonderful legacy in Southern Indiana for excellent patient care and community involvement. Their names have become synonymous with beautiful smiles, fun-loving environment, and charitable activities. Their commitment to their patients has been steadfast and admirable, and they've been leaders in the local dental community. We look forward to continuing that tradition for many years to come.

Staff

Our amazing, dedicated staff is a focal point of the experience at our office. They help cultivate a caring, friendly environment so that every appointment is as fun, quick, and painless as possible. They possess super orthodontic skills that enable them to provide the best orthodontic care, and they're constantly finding creative ways to bolster the office experience. Teamwork is paramount to success, and orthodontics is no exception.

When they're not working to straighten teeth, you may find them having fun together out in the community. Be on the lookout!

Serving Southern Indiana for over 35 years.

Michael Becht DMD MS

Dr. Becht is a native of Louisville, KY. He is a graduate of Saint Xavier High School where was president of Student Council and ran for the cross country and track teams. He obtained a degree in Biology with honors from the University of Dayton where he also ran cross country. He then returned home and graduated with honors from University of Louisville School of Dentistry in 2006. He is very happy to be back in the Louisville area after his 3-year residency at West Virginia University in Morgantown, WV, where he earned a masters of science in Orthodontics. Dr. Becht remains active in education as he is a part-time faculty member at the University of Louisville orthodontic residency and thoroughly enjoys the ability to keep up to date with new trends in the orthodontic field.

Dr. Becht is an active member of the American Association of Orthodontists and Southern Indiana Dental Society. He is a past president of The Kentucky Association of Orthodontists. Dr. Becht and his wife, Becca, have one son, Harrison. Dr. Becht's personal interests include running (he has completed the Boston Marathon 3 times), golf, hunting, and college sports (especially the University of Louisville). He also enjoys learning how to cook.

Keith Nicholson DDS MS

Dr. Keith is a native of central New York, but he embarked on a journey south to North Carolina after graduating high school. His snow-shoveling muscles needed a rest! He is a magna cum laude graduate of Davidson College and played soccer for the Wildcats. Following college, he went to dental school at the University of North Carolina where he received his DDS earning honors with distinction. Dr. Keith subsequently moved to Kentucky to begin his orthodontic residency at the University of Louisville. He obtained a Certificate in Orthodontics and MS in Oral Biology for his research on Invisalign.

In addition to spending time in private practice, Dr. Keith is a part-time faculty member at the University of Louisville orthodontic program. He finds it invigorating to be part of the academic environment where he is able to teach residents and stay abreast of emerging techniques and technology. He also remains active in the American Association of Orthodontists and several local organizations where he serves as the Treasurer for the Southern Indiana Dental Association.

Dr. Keith loves orthodontics because it involves working as a team with co-workers and patients. Dr. Keith and his wife, Lauren, have two snarky cats, Cheerio and Oats. Outside of the office, his favorite activity is spending time with family and friends. Otherwise, he enjoys soccer, tennis, martial arts, traveling, and cheering on his favorite sports teams.

Our Patients and Community

Working with our patients is the most rewarding part of orthodontics. Being proficient in a diverse scope of orthodontic treatments enables us to work with patients of all ages, which enriches our experience. Achieving successful outcomes for our patients motivates us to constantly evolve by adopting new technologies to provide patients with the most efficient, highest-quality treatment.

Patients are also a conduit to our local community and they introduce us to numerous ways to be an active participant in local events and organizations. We are proud members of Southern Indiana, and we firmly believe that charity is the backbone to any community. As a result, we dedicate our time to numerous local charities as well as local business initiatives that promote economic growth and networking in Southern Indiana. We are beholden to our community and our patients (past, present and future), and we graciously thank you for your trust in our office.

Treatment

Orthodontics is an exciting field of dentistry which aims to establish a healthy smile and functional bite. Orthodontics may also provide the benefit of improving self-esteem by developing a more confident smile. After orthodontics, patients are given retainers to preserve the positive changes achieved during treatment.

Our orthodontists have completed a residency after dental school to specialize in correcting orthodontic problems. Our commitment to both providing contemporary, evidence-based treatment and to advancing the profession is embodied by our active involvement in education at the University of Louisville Orthodontic residency program. Our orthodontists were invited to teach at the University, and they have invested their time in educating the next generation of orthodontists. Additionally, our orthodontists participate in several dental study clubs where they learn about new techniques and research in other dental fields. This pledge to continued education and to collaboration with their dental colleagues helps ensure patients are receiving the best care possible.

Orthodontics is for both children and adults with the latter being a fast growing part of the patient population. Below are services offered at our practice:

- Comprehensive treatment
- Limited treatment to address specific concerns
- Phase I (early) treatment for children
- Braces (clear and metal), Invisalign, and Retainers
- Combination orthodontics and jaw surgery
- Accelerated orthodontic techniques
- **Intraoral scanner (proxy for traditional molds/impressions)**
- **In-house laboratory**

Working with Your Dentist

Collaboration with dentists is a fundamental part of orthodontics. Orthodontics is just one aspect of a patient's oral health so it's essential that we work with dentists and other dental specialists to provide the best outcomes for our patients. This underscores the importance of maintaining regular visits with your dentist during orthodontic treatment.

Your First Visit

We offer free consultations at our office. Your first visit is an introduction to our doctors and amazing staff. You'll have orthodontic records taken and an orthodontic exam completed. Subsequently, the doctor and treatment coordinator will summarize the orthodontic problems and present options to address them. Treatment fees and potential insurance coverage will be discussed during this appointment. Our office accepts numerous insurances and offers flexible payment plans to make treatment as affordable as possible.
